EDUCATION

Jackson State University

Jackson, MS

Major: Bachelors, Computer Science

Expected Graduation, May 2028

- **GPA:** 4.00/4.00, President's List
- **Relevant Coursework:** Calculus I, II & III, Data Structures & Algorithm, Computer Science I & II, Digital Logic with Laboratory, Data Analytics, Computer Architecture, Probability & Statistics, Machine Learning Foundations

SKILLS

Languages & Tools: Python, JavaScript, React, Node.js, C++, Java, SQL, MongoDB, HTML/CSS, Git, Linux, Nmap, Nessus, Burp Suite, Wireshark, AWS

Frameworks & Technologies: TensorFlow/Keras, Pytorch, Sklearn, DeepLabCut, Machine Learning Pipelines, REST APIs, Data Processing, Model Evaluation

Soft Skills: Leadership, Problem Solving, Communication, Time Management, Teaching, Collaboration, Organization

EXPERIENCE

RapidReliefAI

Remote

A disaster-intelligence startup delivering rapid, AI-verified damage assessments from drone imagery.

Chief Technology Officer (CTO) / AI Engineer

October 2025 – Present

- Built the v0 disaster-assessment pipeline that automated image ingestion, delta-feature extraction, and GeoJSON/CSV reporting, enabling 45,000+ parcels processed, 1,200+ reports generated, and a 50 percent faster triage workflow.
- Developed and tested damage-classification models achieving 94.2 percent accuracy, built a small ground-truth set for validation, and resolved ingestion and inference issues that cut missed structural risks to under 5 percent.

Mississippi E-center (JSU)

Jackson, MS

A university innovation hub providing technology development and cybersecurity support through research and operations.

Cybersecurity Intern

September 2025 – Present

- Completed hands-on training with 5+ security tools including Nmap, Nessus, Wireshark, and Burp Suite, and conducted vulnerability assessments across 4 systems to identify high-severity security gaps.
- Conducted vulnerability assessments across 4 systems using Nmap, Nessus, Burp Suite, and Wireshark, identifying 11 high-severity security gaps and contributing to remediation steps that strengthened overall system security.

Anote (Break Through Tech AI Studio)

Remote

A conversational-AI platform that enables secure, document-grounded chat, classification, extraction, and QA.

AI/Machine Learning Engineer - Fellow

September 2025 – December 2025

- Built and deployed multilingual chatbots supporting 5+ languages, fine-tuned on company documents to increase Q&A accuracy from 48 percent to 90 percent using retrieval-augmented evaluation.
- Automated the BLEU/BERTScore evaluation pipeline, eliminating 6 hours of manual scoring weekly and enabling real-time model leaderboard updates for faster iteration.

PROJECTS

Malicious Network Traffic Detection Model

September 2025 - Present

ML project providing high-accuracy intrusion detection through analysis of large-scale network traffic patterns.

- Developed machine learning models using the UNSW-NB15 dataset (2.5M records, 49 features), achieving 93 percent intrusion-detection accuracy across Random Forest, SVM, and Neural Network classifiers.

Airbnb Superhost Prediction

July 2025

Predictive Analytics project providing Superhost classification through supervised learning and model optimization.

- Built a Keras feedforward neural network to classify Airbnb Superhosts, achieving 92 percent test accuracy and outperforming logistic regression and decision tree baselines by 14 percentage points.

Personal Portfolio Website

September 2024 - October 2024

A personal branding project providing professional visibility through a responsive, user-focused web design.

- Built a responsive personal portfolio website using HTML, CSS, and media queries, increasing visitor engagement by 40 percent over 3 months based on session duration and repeat visits.

ACTIVITIES AND LEADERSHIP

- Break Through Tech Fellow Ambassador, Men Of Excellence (JSU), AI4ALL Ignite Fellow
- SGA Representative, W.E.B. Du Bois–Harvey Honors College
- IEEE Robotics Club, NSBE, ColorStack
- HBCU Founder's Initiative Pitch Competition, Datathon (Break Through Tech Hackathon 2025)
- Schoolhouse.world Volunteer Tutor (SAT Math, Calculus, Computer Science)
